

**2018 TEXAS MASTER NATURALIST
SPRING BREAK SCIENCE MINI CAMP:**

Monday, March 12

Tuesday, March 13 &

Wednesday, March 14

Location: Park Activity Center

Monday, March 12th: Water is Life

For the start of our science mini camp, Master Naturalists will focus on the water cycle and how it affects our lives and the lives of all plants and organisms on Earth. Participants will also test the water in Lake Livingston, which provides over 87% of Houston's drinking water. This program is designed and limited to children ages 8 to 15.

Tuesday, March 13th: Bats: Creatures of the Night

Join Master Naturalists to learn all about the life, habits, and benefits of these wonderful nocturnal creatures. Participants will also build bat houses for the park! This program is designed and limited to children ages 5 to 15.

Wednesday, March 14th: What the Buzz!

Join Master Naturalists to learn all about the science behind our favorite pollinators, the North American Honeybee. This program is designed and limited to children ages 5 to 15.

Reservations are required for all of these activities and can be made by calling the park store at 936-365-2201 x2060. Only 15 children can participate each day so sign up early! All activities provided at no additional charge, park admission fees apply. Activities are limited to children 15 and under and a parent or guardian must be present at all times.
